

Sidewinder-DOUBLE "E" Electric Two Seat Go-Kart

A concession chassis with years of reliable service coupled with industry proven electronics take the electric kart to the next level.
Suitable for indoor or outdoor use

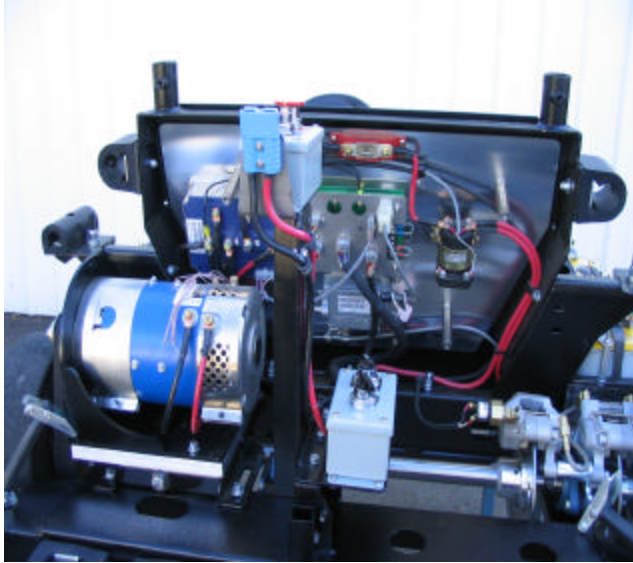

We have chosen a system based on a protocol developed and proven by Industrial Electric Vehicles used to move heavy loads in dirty, damp and dangerous environments where breakdowns could be lethal.

Speed set at 18mph (Set @ J&J) Top speed can be adjusted up or down by adjusting accelerator cable or by using different drive sprockets.
Low Range Speed 12mph
Brake Cut-Off switching prevents "Power Breaking"

Features

- 7 HP Separately excited Motor
- Industrial controller with on board diagnostics
- Safety interlock to prevent unattended run away karts
- Industrial throttle mechanism
- Broken wire protection
- Full regeneration capability
- Two forward speeds plus reverse
- All industrial switches
- Modular circuit board for easy diagnostic, replacement and eliminates excess wiring.
- Kartrol remote shut down available

- Optima yellow top Deep Cycle Battery, D34/78-950
- Zivan 240 Volt 80-95 amp Charger set for the specific charging curve for the Optima yellow top batteries

- All stop switch
- Back-up mode (engageable by concession operator, not driver)
- Accelerator pedal will not work when reverse is engaged.
- Heavy Duty Anderson style charging connector
